Engineering with Intelligence

**Winner of Tekla Model Competition**

**3D Modeling based Detailed Engineering Services for**

- Commercial Buildings
- Power & Process Plants
- Refinery, Petrochemicals & Fertilizers
- Cement plants, Material Handling Systems
- Industrial & Technological Structures
- Pre-Engineered Buildings
- Oil & Gas

## About InSteel Engineers

**InSteel Engineering Pvt. Ltd.** (Formerly known as Intel Engineering Services) has emerged as one of the value added engineering service provider in the field of Structural Design & Detailing based on 3D modeling technology. 3D Solid Modeling & Detailing offers tremendous benefits to project developers, Consultants, Contractors and Steel Fabricators such as accurate B.O.Q, GAD's, Fabrication Drawings for Power Plants, Petrochemical and Refinery projects, Industrial buildings, Material handling systems, Commercial complexes, Pre-engineered buildings.

Founded in 2000 with group of experienced Structural Engineers & Draftsman, who has brought their experience working with many Indian as well as International EPC's, Consulting Engineers, Architects, Contractors & Fabricators, which is InSteel's asset in turn for our clients as they can entrust on us for quality output for any kind of project execution.

We are committed towards our quality & strive to improve it the best we can that ensures clients trust on our deliverables. Our services has helped our clients to effectively address projects of any size and complexity & many times without investing into non-core areas of their business and sometimes when they have targets to achieve within stipulated time schedule with limited resources at the hand.

Our aim is to further become most useful and reliable business associates of our customers for any of their business needs those are our expertise. Our team's professional approach towards any job will ensure timely delivery, best possible cost effectiveness and highest standard of quality. Our technological knowhow of industry, job experience, highest level knowledge of 3D tools (Tekla Structures, AutoCAD) and custom oriented approach towards each job makes us exceptional and distinctive when it comes to competition.

InSteel has provided engineering services for refinery structures, power plant, steel plant, cement plant, fertilizer plant, industrial buildings and other industrial and general engineering projects – Pipe Racks, Cable Rack, Technological Structures – Equipment Support Structures for Boilers, SRU Structures, Reactor Building, Condensate Structure, Waste Heat Boiler Structure, Pre-reformer Structure, Compressor House, Equipment Platforms, Access Platforms, Trusses, Girders, Ladders, Handrails, Stairs, Gratings, Transmission Tower, Steel Bridges, Material Handling Structures, Commercial buildings, Communication Towers, Stack, Duct work, Chimney, Flare Stack Support Structures, Structural Steel Frames, Canopies, Pre-engineered Buildings.
